LDDC Fee Schedule Addendum

1. A **diagnostic case** is defined as specimens submitted to LDDC for diagnostic purposes on one or more animals from one owner and residing at one premise. A complete history is needed for LDDC to provide the best diagnostic services for you and your client.
2. A **regulatory case** is defined as specimens submitted to fulfill legal requirements for the movement of animals (e.g. import/export, interstate) and in support of state and federal surveillance, control and eradication efforts. The \$10 accession fee will not apply to these cases. The submitter must fill out regulatory forms completely and specimens clearly labeled with the animal's id/name.
3. A **food animal case** includes all domesticated species that are raised for food. This excludes wildlife species. Industry agreements may alter billing on some species.
4. All samples submitted to the LDDC become the property of the laboratory unless agreed to by written agreement prior to submission.
5. All necropsy pricing is capped for all species as listed in the fee schedule. When an animal is submitted to LDDC for a necropsy, the lab will run all tests indicated to obtain a diagnosis at the fixed fee with no exceptions. Necropsy fees include carcass disposal.
6. Field necropsies (those done by the client) have reduced pricing to adjust for work accomplished outside the laboratory.
7. **The LDDC does not provide euthanasia services.** We reserve the right to not accept live animals to assure the safety of our employees. Please arrange for euthanasia before submission to LDDC for a necropsy.
8. The only exception to the cap for food animal testing (\$30 for an adult, \$20 for < 1 year) is for BVD Ear-notch ELISA PI testing. These will be billed at \$3 per test.
9. Non-necropsy horse, pet, and poultry cases will be billed a per test charge for all tests. A non-necropsy case is any case submitted to LDDC that does not involve a necropsy.
10. Cytologies on fluids and aspirates will be billed \$15 per specimen. This includes a cell count and a pathology assessment by a pathologist. Impression smear cytologies will be billed \$10 per specimen and involve only the pathology assessment. Cytologies are done at no extra charge for necropsy cases.
11. Out-of-state submissions will be billed at 150% of the In-state fees plus a \$10 Out-of-state processing fee. Animals residing on premises in Kentucky will be billed at the In-state rate.
12. Specimens referred to another laboratory will be assessed a \$20 handling fee.
13. A fee of \$25 will be assessed on packages that are leaking upon arrival at the laboratory.
14. The submitting veterinarian will be billed for LDDC services. Owners may submit animals for necropsy with the approval of their veterinarian. In this instance, owners must pay for services at the time of specimen delivery.
15. Services are billed monthly and payment is due upon receipt. The LDDC reserves the right to inactivate accounts when payment for services is not received in a timely manner.
